

Amendments to the Specification:

Please replace the paragraph beginning at page 2, line 21 with the following amended paragraph:

D-ring 11 has a U-shaped portion comprising legs 11A and 11B between the U ends of the U joined by bight 11C with a bar 11D formed with a small gap 11E in the middle extending between legs 11A and 11B of length corresponding substantially to the distance between the U ends, and residing in the loop formed by band 13. The width of gap 11E, typically about 1/8 inch wide, is about the span or diameter of the cross section of the material forming key holding ring 12 to facilitate insertion of the latter into D-ring 11 during assembly. The opposed portions of the band are preferably fastened together for most of its length as shown, to define an opening 13A accommodating bar 11D.
